

Soft Water Benefits

Many water supplies contain hardness minerals (calcium and magnesium) . These minerals form a scale and create problems in water heaters, washing machines, dishwashers, coffee makers, humidifiers, and plumbing systems. Water conditioning systems eliminate hard water problems. They remove calcium and magnesium from your water by filtering it through a resin softening medium. Either sodium or potassium is used to revitalize the system periodically to provide soft water for your daily needs. The control for this system is designed and engineered to give you reliable operation and conserve the water and sodium/potassium required in the regeneration process. Take a close look at all of the advantages shown here and you'll find that conditioned water makes a refreshing difference in your life and will save you money now and in the years ahead.

- **Soap Saver** - Hard water impairs the cleansing strength of detergents. Conditioned water not only delivers greater washing power, it reduces soap requirements up to 70%. Protects your washing machine at the same time.
- **Clothes Brightener** - Clothes last longer; come out fresher, cleaner and softer when washed in conditioned water. Colors stay brighter too.
- **Pipe Protector** - Over a period of time, hard water scale can form and clog up your plumbing system. As the pipes clog, water flow is restricted and water pressure can be reduced dramatically. A water conditioning system helps eliminate this problem.
- **Money Stretcher** - The cost of your cleaning supplies will drop dramatically with conditioned water because you'll use less soap and fewer harsh chemicals to get the job done.
- **Dish Sparkler** - Tired of streaks and spots on glassware and dishes? Conditioned water eliminates this problem, and helps your dishwasher last longer, too.
- **Hot Water Guard** - Conditioned water adds longer life to your water heater by minimizing the scale build-up created by hard water minerals. Saves you money, too. Less energy is required, 17% to 21%, to heat water in tanks without scale build-up.
- **Stain Eliminator** - All bathroom fixtures benefit from conditioned water. There will be no more unsightly rings, stains, or mineral build-up to darken your porcelain.
- **Scrubbing Helper** - Washing floors, tile, and woodwork goes much easier and faster with conditioned water because it eliminates the film and soap scum that hard water causes.
- **Hand Soother** - Red, roughened hands are usually the by-product of hard water. Conditioned water caresses, doesn't irritate.
- **Face Saver** - Say good-bye to razor burn as your razor glides smoothly over your soft water conditioned face. Both your skin and blades will last longer.
- **Hair Pamperer** - A conditioned water shampoo revives hair color and makes it more radiant and manageable.
- **Body Refresher** -Bring conditioned water to your bath or shower and you'll feel a refreshing difference. You'll wash "really clean" faster and without soap build-up on your skin. You'll come away more relaxed and refreshed than ever before.

Conditioned Water: it makes a refreshing difference and saves money, too!
